-Shall Not Have Died in Vain"

Yesterday was the sixth celebration of the signing of the Armistice which brought the great World War to an end. To some it meant nothing but a holiday, to others simply a recollection of a certain day in 1918 when whistles blew, bells rang and the whole country gave vent to exuberant spirits in celebration of the greatest and most terrible conflict ever waged. But there are some who realize the significance of the day.

The bronze tablet on the wall of Mead Memorial Chapel bears silent testimony to what those four years meant to the ranks of Middlebury students who went out to serve their country. They never faltered in the face of duty. They gave their all that wars might be brought to an end. And Middlebury points with pride to them, honoring their sacrifice. While thousands roamed the streets in ecstacies of joyful celebration, there were hundreds of mothers who slipped into the quiet recesses of some church and expressed their thanks and joy to God for the deliverance of their sons from the cruel jaws of death. They not only offered prayerful gratitude, but they prayed that there might never be another war. And for six years their prayers have been answered. During the Civil War General Sherman made a well-known remark that has been handed down in history. What would he have thought of the World War with its scientific methods of exterminating human life? But we are told by military authorities and scientists how whole cities will be wiped out silently in the dark of night by fleets of aircraft if another war should come. We who are in college today will be the statesmen of tomorrow. Are we going to be responsible for the destruction of our civilization by encouraging wars among nations?

Eve.

With Regard to Cuts

There has been more or less agitation regarding changes in the cut system with a view to making it more liberal for the student body, but so far that generosity has not extended to those who merit it, the faculty.

Under the present plan, if a student enters the room one minute late, more or less, he is given a half cut. Though the professors are men of greater years, and should have some prestige by virtue of their positions here, if not out of simple respect for those years, they (Copyright 1924 Collegiate Feature Syndicate.) are not even given that much leeway. If a professor is one minute late to his class, in theory at least, he receives ON THE SIDELINES their usual costume consisting of the a whole cut, as his class under their rights it is true, in the majority of cases will have left. Of course in many cases this rule is not followed, the class gives the instructor the benefit of the doubt and remains to see whether he really intended to be absent or whether he over his left arm, we wish to say that The game consisted of three half-hour was merely delayed by one of the many emergencies he needed it before the game was over, periods. bers of the student body. They are not exempt from Before the game "Slick" Whitney slow clocks, or slippery walks. Only too often, however, drop-kicked several over from the 35 this custom is taken advantage of, and the class, with yard line. Each one of the kicks could little thought, rush away blithely from the education have gone over from ten yards further they came so far to gain, and keep on running though they may see the professor within sight of the building, and know that he had no intention of not meeting the class. Though it may be a strong negative argument to say that good example should be set the younger people as to being on time, surely in its origin this tradition was never meant to cover a case of that sort. This state of affairs hardly seems just, especially when some of the professors have to transfer from one building to another and may be detained after the first class by inquiries from their students. At most of the eastern colleges, a class is required to wait ten minutes, and in many of the middle western universities , at least began to get cold and there were slight connected with the Military Departfive minutes after the scheduled hour. It would seem that in a New England college, in a section known for its culture and finish, either by written or unwritten rule, some such custom should be in force here.
